# Forward

Dear reader and user,

**T**his publication brings you information about the Horticulture sector of the Ecofarms and Agroservices company Nigeria. It is designed to help guide potential distributors and buyers, to inform them on all fruits and vegetables available, and to furnish them with all necessary information such as quality of products, prices and delivery terms.

While the threat of malnutrition and hunger are real, our top priority is providing enough safe and affordable food for everyone while mitigating the negative impacts of modern agricultural systems on the environment. We strive to play our part in the industry by leveraging innovative solutions to increase crop yield and to detect and prevent the spread of infestation and disease.

Today there is a growing call to use less chemicals and embrace organic alternatives. We are happy to begin steering in this direction. We are taking big steps towards a much more organically based economy and finding clever solutions for logistic.

We are aware of the enormous opportunity for foodborne infection and food poisoning from harmful germs, use of harmful agrochemicals, to poor post-harvest management along the journey from farm to table. We are committed to continue to put measures in place, to reduce to the barest minimum and where possible completely eradicate such loopholes and practices directly by implementing biohazard guidelines inhouse in our fields, and directly with farmers and other outlets where we purvey, to increase food quality.

Finally, we understand the power of synergy, partnership and inclusiveness. We can achieve more together and create more value in all areas. As a socially responsible business, we function by encouraging cooperation along all food chains from producers to consumers. This has helped us to build more resourceful network of farmers and profifers resulting to a more stable economic ecosystem that guarantees a secure and profitable market for all.

We hope that the catalogue will make it easier for you to select the best products that meet your expectation.

Sincerely, the Ecofarmsfresh team

We are committed to deliver fresh and tasty farm produce to our customers worldwide in full compliance with ethical and environmental regulations. Quality assurance is guaranteed from the farm up until delivery.

## Safe and Good for you

**V**egetables and fruits are tasty and good for you, a healthy counterweight to our unhealthy fats and sugars. Those who eat enough fruits and vegetables reduce their risk of ‘disease of affluence’ like diabetes, obesity or heart and vascular disease. The nutritional and health benefits of consuming fruits and vegetables as part of a diversified, balanced and healthy lifestyle cannot be overemphasized. When we think of healthy eating, the first food items that often comes to mind are fruits and vegetables. They are colorful, rich in vitamins, minerals and fiber. They are vital for the proper functioning of the human body. Orchard fields and other by products of horticulture make our environment greener and that also makes us more comfortable, healthy and happier.

### **Production Growth to satisfy your orders:**

Production of fruits and vegetables is one of the most important sectors in agriculture. At Ecofarms and agroservices, we are working with a large network of other farmers to guarantee a continuous supply to meet your needs.

### **Competitive prices for competitive products:**

Our Premium fresh vegetables and fruits affords you the most competitive price you can find.

### **Standardized quality to satisfy you and your buyers:**

Our production engages cut edge processing, packaging and logistic protocols to guarantee a standardized quality.

*Always fresh fruit and vegetables delivered on time according to the order and the quality requirement of the client*

## Only the Best is good enough

**W**e provide deliveries 3 day a week. (Mondays, Wednesdays and Fridays)  
We are working to extend deliveries to 7 days a week .  
Due to the ongoing expansions with our farms and long cooperations with farmers, we are able to deliver goods of the highest quality customized to the needs of each individual organization and customer. We provide our customers with professional service together with delivery to the specific address.

## Pepper

Our top-quality pepper varieties and cultivars are exotic and also indigenous. Designed to meet a dynamic appetite. We pick our vegetables with care and lock in freshness and flavor by precooling within 30 minutes from picking.

## Tomatoes

Tomatoes are an every day favorite for us, we cherish them, its impossible to imagine the world a day without them in your meals.

We are committed to work and ensure our tomatoes get to you fresh, colorful and whole with the best possible quality.

## Carrots

Nothing beats the crunchy taste of carrot. The plateau's local climate which is rich and ideal affords us the luxury for an all-year-round supply of fresh, nutrient packed vegetables.

## Cruciferous Vegetables

If you care about the ethical journey of your vegetables, how they arrive at your plate and desire the highest possible quality, then our fresh delivered cruciferous vegetables should be your choice.

## Lettuce

We work with certified partner farmers to grow and create value for quality and food safety to supply fresh nutrient rich vegetables.

## Onions

What else makes you cry in the kitchen and spice up your meal with a refreshing smile? Onions. We work hard to produce flavorsome vegetables every day.

## Pulses

Our fresh, fiber and protein rich pulse, are grown with care and attention to provide an all year round supply of good nutrient rich meals.

## Spices

Happiness, they say is driven by variety, our unique array of spice plants are grown in the right condition and packed with lots of freshness, nutrient and aroma to spice your meals.

## Herbs

We pay special attention to the quality and health of our herbs, ensuring they get to our clients just as they want them.

## Root Vegetables

We have a vast experience in root vegetable crop production. So, our tubers are always of the highest quality. Our storage and delivery protocols ensure they get to our clients fresh and healthy.

## Tropical Vegetables

We are committed to providing indigenous and high value vegetables with the highest possible qualities.

# Cucurbits

Our cucurbit fruits are characterized by reliability and attention to details. We offer products in collective and unit packages.

## Tropical Fruits

We are aware that consumers expect not only the highest quality of fruits and vegetable, but healthy and flavor rich varieties are also top on their list. We work to ensure that only the best is good enough.

## More food and better Health

Our array of Premium low-cost organic farm inputs are designed to replenish soil nutrients and restore soil health while mitigating environmental impacts.

We are committed to working with small holder farmers to produce more healthy food options; while building fair market structures and reducing food waste along value chain.

## **A fresh approach to food processing and logistics**

We strive to guarantee our clients safety, and the best quality by instituting the finest possible food processing protocol to eliminate foodborne illness.
